

Under the **laser** light tree!

Prof Dr Norbert Gutknecht
WFLD President
Editor-in-Chief

_The year 2011 was full with a numerous of highlights.

Depending on the regional cultures and customs, the christmas trees are differently adorned. A big variation of different light sources are found all around it, generating varying pleasant impressions of all kinds.

Looking at our "Laser Light Tree", the year 2011 generated a number of new laser light sources and laser light combination in medical and dental devices generating varying pleasant treatment methods. Presents under the Christmas trees can be compared with the different conference meetings, exhibitions, and congresses such as IDS, WFLD-ED and a number of national meetings.

All we can say—it was a rich and enlightening year.

Now, the year 2012 is just around the corner, triggering special expectations. For sure, the WFLD congress in Barcelona will be the highlight in laser dentistry in the upcoming year 2012, where participants from all around the world will share their experiences and knowledge in their fields of expertise.

Looking forward to meet you in Barcelona I wish you all a Merry Christmas and a Happy New Year.

A handwritten signature in black ink, appearing to read 'Gutknecht', written in a cursive style.
